CASE I.

"I AM NEW TO MOBILITY SHARING"

I AM LOOKING FOR A FULL-SCALE SOLUTION

Want to start a sharing business with little-to-no previous experience? We'll direct you through the whole process step-by-step and provide all the necessary information, no matter your situation – if you are looking for a small or large, public or private, manual or electrified sharing.

PUBLIC OR PRIVATE SHARING

When it comes to mobility-sharing, the first thing you should consider is your business model.

MANUAL OR ELECTRIFIED VEHICLES

We have developed an advanced charging infrastructure system, ECHIRON-X MOBILITY CHARGING STATION, which was built to work with your fleet seamlessly.

SMALL VS LARGE?

"You can choose to start with the model that currently fits your business needs."

ANTIK www.antiksmartmobility.com

CASE II.

"I AM A VEHICLE MANUFACTURER AND I WANT TO START A CUSTOM MOBILITY SHARING"

I AM LOOKING FOR SOFTWARE INTEGRATION SOLUTIONS

We've built an integrated operating platform that enables you to get your e-mobility fleet sharing up-and-running in a matter of days. Our cloud service transfers comprehensive e-mobility data to your custom backend system through every vehicles's & charging stations's built-in ECU. Additionally, we provide a personalized end-to-end APP that incorporates a secure payment gateway customised to your company's sharing requirements.

CASE III.

"I ALREADY HAVE A SHARING COMPANY, BUT I WANT TO EXPAND MY FLEET"

I AM LOOKING FOR NEW TYPES OF VEHICLES

Expand your fleet by our diverse range of unique, super-stylish models – e-mopeds, e-mountain bikes, e-motorbikes or kayaks. If you want to go electric, we have designed a new charging infrastructure system that can be seamlessly integrated with your already-existing fleet.

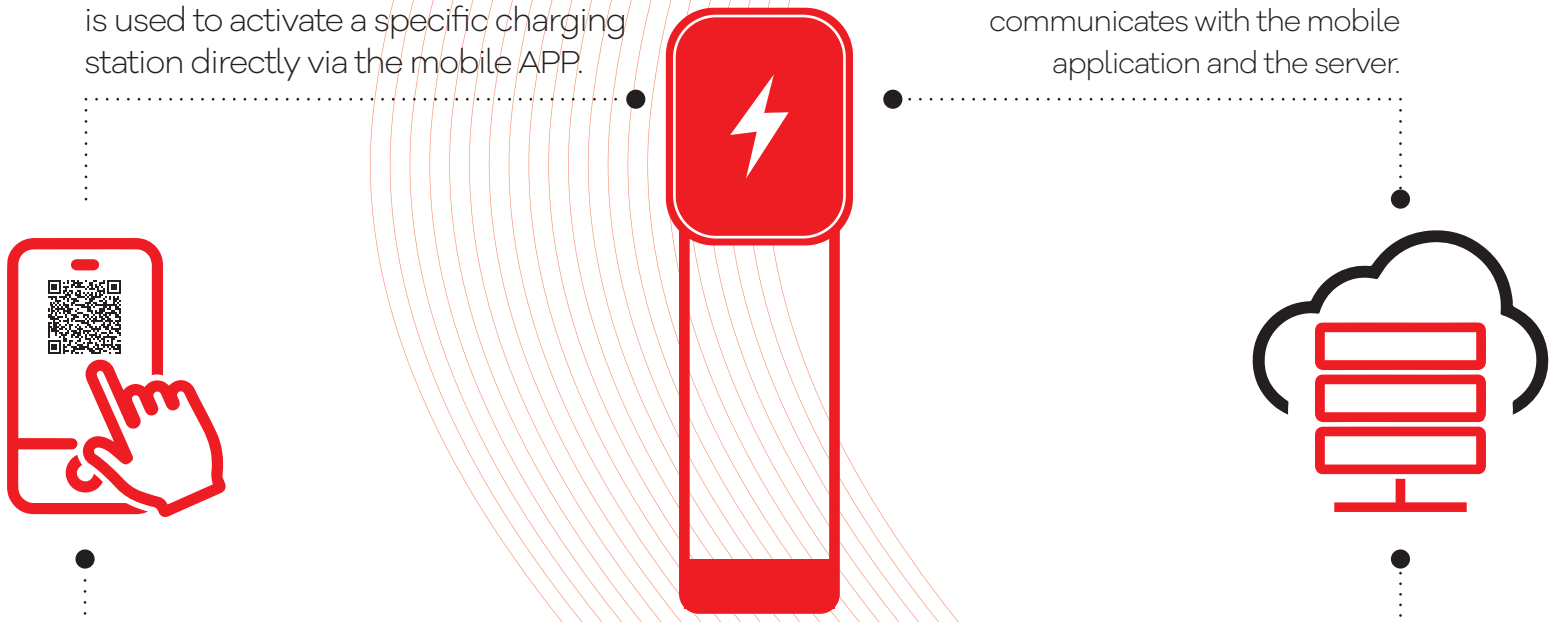
ANTIK E BIKE
VEREJNYSKUTER.SK

LAUNCH YOUR OWN HASSLE-FREE CHARGING INFRASTRUCTURE TO MEET BOTH THE CURRENT, AND THE FUTURE MARKET DEMAND FOR ELECTRIFIED VEHICLES.

QR code
is used to activate a specific charging station directly via the mobile APP.

The charging station communicates with the mobile application and the server.



Thanks to the integrated Payment Gateway, charging fees are paid directly via the mobile APP.

Charging infrastructure network is monitored and managed on a server.

#1 NANO-E 230V POWER SOCKET

YOUR BRAND / YOUR COLORS

NANO-E is a universal, remotely-controlled SMART charging power socket, best suited for micro-mobility charging (e-bikes, e-scooters ect..) and other electric devices below the power consumption of 2000W.

Charging station type	Charging connector	Maximum power output	Electricity requirements
230 V / 16 A (EVSE mode 1)	**1x CEE 7 / 4 16A**	**3,6 kW**	**1x 16 A**

Horizontal or vertical installation.

#2 ECHIRON-SIGNAGE FOR E-CARS

YOUR BRAND / YOUR COLORS

The ECHIRON-SIGNAGE features a high-quality 55-inch color display, and a 2×7 kW IEC Type 2 connector used to charge electric vehicles (allowing two vehicles to be charged simultaneously).

Charging station type	User interface	Maximum power output	Electricity requirements
EVSE Mode 3 (AC charging up to 22kW)	**High-brightness 55" LCD display**	**7 kW / 11 kW / 22 kW**	**3x 32 A / 3x 63 A**

#3 ECHIRON-X MULTI-CHARGER

YOUR BRAND / YOUR COLORS

The revolutionary ECHIRON-X is a universal multi-charger capable of charging 9 devices simultaneously. The charging station has 4 different plugs – a 22kW AC adapter used for electric cars (which enables either 1-phase, or 3-phase charging at up to 22kW), three 230V AC ports used to charge e-mopeds or e-motorcycles, and three 36V / 4A outputs used to power small e-vehicles, such as e-bicycles and e-scooters. ECHIRON-X Charging station features a built-in electrometer used to accurately measure the total net charge (used for utility purposes).
